

Winterize Your Trucks!

- Check all belts and hoses
- Test antifreeze level in the radiator
- Check windshield wiper blades
- Check defroster operation
- Check level of washer fluid reservoir tank

Tips for your drivers:

If it's cold enough to see your breath...

- Keep engine block heater plugged in at night
- If possible, keep truck garaged
- Add fuel conditioner **each time you fuel-up!**
- If extremely cold, let truck run constantly (if possible)

If into winterized, expect:

- Wrecker charge to shop
- Bill to thaw out truck
- Excessive down time...

It's your choice!
